EDUCATION

I.K. Gujral Punjab Technical University

Expected June 2027

Bachelor of Technology in Computer Science & Engineering

Punjab, India

- **CGPA: 8.1/10** (till 5th Sem)
- **Relevant Coursework:** Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering

EXPERIENCE

Future Finders

June 2025 – July 2025

Industrial Trainee

Punjab, India

- Completed a **45-day intensive industrial training** program focused on **MERN stack development** and modern deployment workflows.
- Developed a **full-stack personal portfolio website** using **MongoDB, Express.js, React.js, and Node.js**, implementing secure routing and responsive design principles.
- Engineered **robust RESTful APIs** and implemented **JWT-based authentication** to secure user sessions and backend routes.

PROJECTS

Arjuna Agri | *Next.js, TypeScript, Groq AI, Gemini, Supabase*

[Live](#)

- **Led a team of 4** to architect and ship an **AI-powered precision agriculture platform** at a hackathon, handling full-stack development from database design to deployment.
- Built **7+ farm management tools** including a fertilizer calculator, irrigation scheduler, input cost tracker, and crop calendar — covering end-to-end farm operations in a single platform.
- Integrated **Groq AI and Gemini APIs** to power soil test analysis, crop disease detection, and yield & ROI prediction with real-time intelligent recommendations.
- Implemented market prices & MSP tracking, farm profile management, and Supabase-backed authentication, supporting **10+ distinct farmer use cases** across AI and management modules.

Rental Listings & Move-in Platform | *MongoDB, Express.js, React.js, Node.js, JWT*

- Developed a rental app with **3 role-based dashboards** (tenant, landlord, admin) and **15+ REST API endpoints**.
- Added a visit tracking system tracking the entire flow from booking to move-in decision, **reducing coordination time by 50%**.
- Designed the database from scratch with **5 linked MongoDB collections** and established a 3-step listing approval workflow.
- Engineered dynamic search functionality featuring 6 core filters, securing all backend routes with **JWT authentication**.

ACHIEVEMENTS

Hackathons: Competed in **Hack-N-Win 3.0**, leading a team of 4 to architect and ship '**Arjuna Agri**', a full-stack AI agriculture platform, within the hackathon time limit.

Problem Solving: Solved **100+ Data Structures and Algorithms problems** on [takeuforward](#)

Technical Writing: Actively publish technical articles on [Hashnode](#) covering **frontend architecture, backend development and authentication systems**.

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript

Frontend: React.js, Next.js, Tailwind CSS

Backend & Databases: Node.js, Express.js, MongoDB, Supabase

Tools: Git, GitHub, VS Code, Cursor, Claude Code
